#### 'HKACS - Jockey Club "Walking Hand-in-Hand" Cancer Family Support Project'

According to the latest data of World Health Organisation, Cancer is the leading cause of morbidity and mortality worldwide. In 2012, approximately 14 million new cancer cases and 8.2 million cancer-related deaths were reported. According to the Hong Kong Cancer Registry of the Hospital Authority, it is estimated that 27,000 in every 100,000 people were diagnosed with some types of cancer, with an average of 1 cancer case in every 5 people.

Fighting cancer is a long-lasting battle and would cause mental and physical exhaustion for both the patients and their families. In order to provide free and comprehensive support for the patients and their carers in different stages, our Medical & Health Services collaborated with The Hong Kong Anti-Cancer Society to conduct 'HKACS - Jockey Club "Walking Hand-in-Hand" Cancer Family Support Project'. The patients and families are able to receive both medical and psychological support via a collection of activities in the project, including telephone consultations, face-to-face advice, local support group gatherings, home-visiting, talks, as well as family activities to enhance the quality of life. We also strengthen collaboration within the multi-disciplinary team of clinical psychologist and registered dietitians to give a comprehensive support to the patients and families.

This project provides an excellent opportunity for Medical & Health Services to collaborate and share our experiences with the professional team of The Hong Kong Anti-Cancer Society and gain experience in cancer management. Our clinical intervention skills were also strengthened from a series of trainings provided by The University of Hong Kong and will ultimately benefit the cancer-stricken families through multi-sectoral collaboration.

香港大學是本計劃緊密的合作伙伴,在過程 中透過定期的健康測試及問卷調查,分析參加 者在參與計劃後身體機能及家庭 / 鄰里關係的 變化,以實證研究闡述計劃成效,有助進一步 將「零時間運動」推廣至不同社區,為更多家 庭帶來「健康 (Health)、快樂 (Happiness)、和 諧 (Harmony)」的 3H 生活。

#### **Community Health Campaign:** 'Fitter Families Project'

Kwun Tong was a district with large number of underprivileged people who put bread and butter before their health and family life. Therefore, with the funding subvention of The Hong Kong Jockey Club Charities Trust, the Agency collaborated with the School of Public Health of The University of Hong Kong (HKU) and launched a Community Health Campaign: 'Fitter Families Project' (the Project) targeted people living in undesirable physical environment in Kwun Tong, such as old urban area and squatter huts. Through a series of activities including workshops, community education programmes and family activities, we promoted an innovative 'zero-time exercise' concept to the public, which encourage participants increasing physical activities while sitting, standing and walking so as to achieve physical well-being without using extra time, money and equipment. The project further suggested participants to do regular 'zero-time exercise' with family members and neighbours to enhance communication between people, build a happy family and establish an energetic community.

HKU was a close partner of this Project. Through conducting regular health tests and questionnaires in the process examining the changes of participants' physical health, family and neighbourhood cohesion after participating in the scheme, the evidence-based research not only increased the reliability of the Project, but also helped further spread the concept of 'zero-time exercise' and bring Health, Happiness and Harmony to families and different communities

Hand-made leather &Care products show the strengths and capability of different service users

#### '&Care Hand Stitched Leather Project'

'One Sky, We are the same!' There goes the vision of the core service of Opportunities & Inclusion for People with Disabilities. In 2009, service users of Integrated Vocational Rehabilitation Service began to participate in the production of fine leather products. From needlework, colour matching to design, the finished products were gradually appreciated by enterprises and the public. Under meticulous training of our instructors, our service users not only created glamorous Hand-made leather products, but also built a platform for social communion.

Last year, we worked closely with Cathay Pacific Airways Limited and Hong Kong Dragon Airlines Limited in discussing collaboration plans to bring value of inclusion to new communities. Achievement was obtained after several months' preparation. Hand-made leather & Care products produced by service users of Tsui Lam Sheltered Workshop could be seen and purchased by passengers from different countries or districts through flights of the Cathay Pacific Airways and Cathay Dragon Airlines. More importantly, the meaningful stories behind our brand could be extended to the public through each of the unique product, showing the strengths and capability of different service users.

Thanks to Cathay Pacific Airways Limited and Hong Kong Dragon Airlines Limited, the power of communion has now been spread far and wide.
